## The Modern Cybersecurity Challenge

Key Risk Landscape:

- **Average Breach Cost:** $4.35M per incident plus reputational damage
- **Mean Time to Detect and Contain:** 200 days to detect a breach and 70 days to contain it
- **Ransomware Trends:** Notably increasing with payments exceeding $100,000
- **Human Factor:** 80% of breaches involve some form of human error
- **Attack Frequency:** Companies face 10 to 20 targeted attacks per year
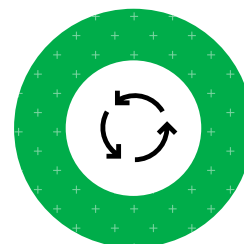

Client Impact Metrics:
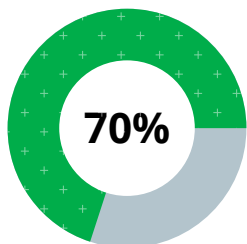

70%
reduction in security response time
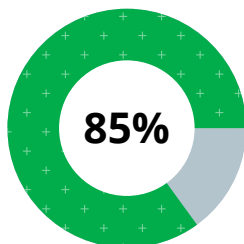

85%
improved compliance readiness

60%
cost savings compared to full-time vCISO

continuous adaptive security posture

In today's dynamic threat landscape, engaging a virtual Chief Information Security Officer (vCISO) is essential for safeguarding your business data and ensuring compliance with evolving regulatory requirements. A vCISO provides strategic cybersecurity leadership by assessing risks, establishing robust security policies, and deploying state-of-the-art technologies—all while offering cost-effective, scalable solutions tailored to your business needs. This role not only enhances your incident response and resilience against cyber attacks but also reinforces stakeholder trust by ensuring that critical data remains protected, enabling you to focus on core business operations with confidence.

Convene's Cybersecurity Governance Program

Our Cybersecurity program includes:

Risk Assessment & Management	Compliance & Regulatory Alignment	Cybersecurity Program Design and Management
• Comprehensive vulnerability mapping • Continuous risk assessment and remediation advice	• NIST, ISO 27001, HIPAA, PCI-DSS standards • Customized compliance roadmaps • Audit preparation and support • Security policy creation and maintenance	• Vulnerability management • Incident response planning • Security architecture design and deployment • Ongoing cybersecurity program management and mentoring • Security awareness training

Why Choose Our vCISO Services:

• **Cost-Effective:** vCISO plans to meet your budget

• **Expertise On-Demand:** Access top-tier cybersecurity talent when you need for as long as you need

• **Scalable Solutions:** Flexible engagement models

• **Strategic Alignment:** Business-focused security approach

Tailored Service Packages

Service Level	Key Features	Ideal For
